GODISHALA PRAVALIKA PRIYADARSHINI

Data Scientist

pravalika.priyadarshini@gmail.com | 9963613727 | Hyderabad, India | www.linkedin.com/in/pravalika-godishala

PROFILE

Aspiring Data Scientist with hands-on experience in Python, SQL, Exploratory Data Analysis, Machine Learning, Deep Learning, Agentic AI, and Power BI. Skilled in building predictive models, performing statistical analysis, developing agentic AI workflows, and extracting business insights from data.

EDUCATION

KNRR Engineering College — Bachelor of Technology in Computer Science and Engineering (AI & ML Specialization) | *12/2021 – 07/2025 | Abdullahpurmet, Hyderabad*

Narayana Junior College — Board of Intermediate Education (MPC) | *05/2019 – 05/2021 | Kothapet, Hyderabad*

Saritha Vidya Nikethan School — Central Board of Secondary Education | *03/2014 – 04/2019 | Hayathnagar, Hyderabad*

SKILLS

PYTHON — Data Types, Operators, Control Flow, Functions, OOPs, File Handling, Data Manipulation. Hands-on experience using Jupyter Notebook/Google Colab for writing and executing Python programs.

EXPLORATORY DATA ANALYSIS USING PYTHON — NumPy & Pandas, Statistical Analysis, Visualization using Matplotlib & Seaborn.

ADVANCED STATISTICS — Probability Basics, Distributions, Sampling Techniques, Hypothesis Testing, Confidence Intervals, Feature Scaling & Statistical Inference.

MACHINE LEARNING — Supervised & Unsupervised Learning, Regression & Classification Algorithms, Model Evaluation Metrics, Feature Engineering, Hyperparameter Tuning using Scikit-learn.

DEEP LEARNING — Artificial Neural Networks (ANN), Convolutional Neural Networks (CNN) for image/feature extraction, Recurrent Neural Networks (RNN) for NLP, Model Building & Training using TensorFlow/Keras.

AGENTIC AI — Designing multi-step autonomous AI agents, tool-calling, orchestration and stateful workflows using LangGraph, prompt engineering, and integration of LLMs with real-world data pipelines. Familiar with Google Antigravity for agentic development workflows.

SQL — DDL & DML Commands, Joins, Subqueries, Views, Aggregate Functions, String & Date Functions, CASE Statements, CTE, Window Functions, ACID & TCL Concepts.

POWER BI — Data Modeling, Power Query for Data Cleaning & Transformation, DAX Basics, Interactive Dashboards, KPI Cards, Slicers & Filters, Data Visualization and Report Publishing.

CYBERSECURITY — Foundational knowledge of Ethical Hacking phases (Reconnaissance, Scanning, Gaining Access), Kali Linux for penetration testing and vulnerability assessment, SIEM & log monitoring using Splunk and Microsoft Sentinel, SOC fundamentals (incident detection, alert triage, threat monitoring), basics of Cryptography, and network/wireless security concepts.

PROJECTS

Agentic AI Data Analysis Assistant using LangGraph — *Agentic AI Project*

- Built an autonomous, multi-step data analysis assistant using LangGraph to orchestrate LLM-driven agents capable of planning, tool-calling, and self-correction.
- Designed a stateful agent graph with nodes for data ingestion, cleaning, exploratory analysis, visualization, and natural-language summarization of insights.
- Integrated tool-calling capabilities allowing the agent to dynamically query datasets, run statistical computations, and generate charts based on user prompts.
- Implemented memory and conditional routing logic to handle multi-turn conversations and iterative refinement of analysis based on user feedback.

Tools & Technologies: Python, LangGraph, LangChain, LLMs, Pandas, Matplotlib/Seaborn

Swiggy Delivery Time Prediction — *Machine Learning Project*

- Built a regression-based ML model to predict food delivery time using features such as distance, weather, traffic, and order details.

- Performed data cleaning, feature engineering, and exploratory data analysis to identify key factors affecting delivery time.
- Trained and evaluated multiple regression models, comparing performance using metrics such as MAE and RMSE to select the best-performing model.
- Derived insights to help optimize delivery time estimation and improve customer experience.

Tools & Technologies: Python, Pandas, NumPy, Scikit-learn, Matplotlib/Seaborn

Financial Data Analysis — *Power BI Project*

- Built interactive financial dashboards to analyze company revenue, net income, cash flow, and balance sheet trends using Power BI.
- Created KPIs, cards, slicers, and multiple visualizations to compare financial performance across companies and time periods.
- Performed data modeling and DAX-based calculations to derive business insights from income statement, cash flow, and balance sheet data.

Tools & Technologies: Power BI, DAX, Data Visualization

COURSES & CERTIFICATIONS

Data Analytics Job Simulation, Deloitte (via Forage) *04/2026*

C-Language, Ram Infotech Computer Education *08/2024 – 10/2024*

Basics of Python Programming, SV Infotech *03/2024 – 05/2024*

Data Science with GenAI, Innomatics *08/2025 – Present*

PUBLICATIONS

Understanding Discrete Probability Distributions: From Coin Tosses to Customer Calls *16/11/2025*

From Real World to Code: Understanding OOPs *10/09/2025*
